I'm an applied mathematician working in the modelling of soft matter, with a background in fluid mechanics, specifically studying poroelasticity (the behaviour of porous, deformable media). I have a particular interest in hydrogels, soft elastic solids formed of a polymer matrix surrounded by water molecules, and their swelling and drying behaviour.

Sep 2026 – Warwick Zeeman Lecturer (equiv. Assistant Professor, 3-year contract), **Mathematics Institute, Uni. of Warwick**

Apr 2024 – Aug 2026 Postdoctoral research fellow, **Mathematics Institute, Uni. of Warwick**
'Shape–Transforming Active Matter', Leverhulme Trust-funded project led by Professor Tom Montenegro-Johnson.

Education and prizes

2020 – 2024 PhD applied maths, **Department of Applied Mathematics and Theoretical Physics, Uni. of Cambridge**
Supervised by Professor Grae Worster, thesis available online: Dynamics of super-absorbent hydrogels

2019 – 2020 Part III Mathematics (MMath), **Trinity College, Uni. of Cambridge**
Exams not held due to COVID-19, essay 'Viscous fingering instabilities' supervised by Dr Katarzyna Kowal

2016 – 2019 MA (Cantab.) Mathematics, 2.i, **Trinity College, Uni. of Cambridge**
Undergraduate summer research in fluid mechanics (2018, 2019)

2025 Finalist, **IMA Lighthill-Thwaites Prize** *for 'Cryosuction and freezing hydrogels' (7)*

2022 Group 1, **Smith-Knight and Rayleigh-Knight Prize, Uni. of Cambridge** *joint top result in cohort*

2022 First prize, **DAMTP fluids second year talks, Uni. of Cambridge** *for 'Dynamics of super-absorbent hydrogels'*

2019 Shortlisted finalist, **STEM for Britain** *for 'Stokes drift through corals'*

Publications

Research leadership

2026- Organising committee member, **UK Mathematical Biology Conference** *local committee member for the 2027 conference to be held at Warwick*

2024- Coordinator, **UK Hydrogels Network** *founding organiser of cross-disciplinary network*

2024-2025 **Soft Matter Lunches, Uni. of Warwick** *seminar series organised jointly with Physics Department*

Dec 2024 Organiser, **Modelling hydrogels: building networks in the Mathematical Sciences** workshop

Dec 2022 & Dec 2023 Undergraduate admissions interviewer, **Trinity College, Cambridge** *devised questions and carried out admissions interviews in-person and online*

2022-2024 Organiser, **Institute of Theoretical Geophysics lunches, Uni. of Cambridge** *informal weekly seminar series*

- **Peer review** journals include Nat. Commun., J. Fluid Mech. (+ JFM Rapids), Phys. Chem. Chem. Phys., Sci. Rep., Q. J. Mech. Appl. Math, La Matematica and Environ. Fluid Mech.
- **Conference session chair** at EFDC2, Dublin 2025 – minisymposium on 'Poroelastic Flows'

- **pgfcet** A `tikz` libary to allow the use of the `colorcet` colour maps with `pgfplots`
- **texnically** A LaTeX-to-SVG tool that embeds the original source into the SVG metadata for easy future editing
- **fix-matlab-eps** A utility to fix the vector output of Matlab's `contourf`, removing artefacts from the EPS output

---

Research project supervision

2026- Supervisor (MMath research project, Uni. of Warwick)
Modelling pollutant spread from rivers to soil

2024- Informal co-advisor, **Xietao Wang Lin** (MSc+PhD, Uni. of Warwick) *with T. D. Montenegro-Johnson*
Machine-learning accelerated simulation of suspensions of elastic microfilaments

2024-2025 Co-advisor, **Usmaan Mirza** (MMath research project, Uni. of Warwick) *with T. D. M.-J.*
An analytical and numerical framework for modelling self-oscillating hydrogels

2024 Small group co-advisor, **Summer Research Programme for Undergraduates from Underrepresented Groups**, Uni. of Warwick *with T. D. M.-J.*
The digital epidemic

Teaching

- **MA4J1 Continuum Mechanics, Uni. of Warwick** (Spring 2027) *30 lectures*, **module lead**
- **MA395 Essay, Uni. of Warwick** (2026-27) *Essay supervisor: "Multiphase fluid flow in porous materials" & "Modelling tumour growth and treatment with continuum mechanics"*
- **MA4N4 Transport Processes in Mathematical Biology, Uni. of Warwick** (Autumn 2025) *27 lectures*, **module lead**
wrote all-new problem sheets and exam(s); 100% of student module feedback 'very good'
- **MA256 Introduction to Mathematical Biology, Uni. of Warwick** (Autumn 2024) *6/30 lectures, cohort size* $\sim$ 120
- **Part IA Introduction to Mechanics, Uni. of Cambridge** (Michaelmas 2022) *5/9 lectures, cohort size* $\sim$ 30

Tutor, Uni. of Warwick (October 2026-) pastoral and academic contact for 10 first-year students

Part III Preparatory Workshops, Uni. of Cambridge (Michaelmas 2023, 2 hours + 10 videos) *Designed and delivered revision content for incoming Part III (masters) students covering all aspects of continuum mechanics, including a series of 10 introductory videos (tinyurl.com/partiiivideos). Content reused and delivered by other instructors in 2024 & 2025.*

Supervisions for Cambridge undergraduate mathematicians (> 300 hours) *small group (usually 2:1) tutorials in applied mathematics*

Part II (3rd year) Fluid Dynamics *(Michaelmas 2020);* ***Part IB (2nd year) Fluid Dynamics*** *(Lent 2021-2024 + revision in Easter 2021-2023);* ***Part IB Methods*** *(Michaelmas 2021-2023 + revision in Easter 2023);* ***Part IB Variational Principles*** *(Michaelmas 2021-2023 + revision in Easter 2023)*

Outreach

2025 **Origami artwork** *based on 'Poromechanical modelling of responsive hydrogel pumps' (8) with Coco Sato*

2021 **Cambridge Festival** *wrote and produced a video on poroelasticity and coffee makers*

2019-2020 Captain, **BBC *University Challenge*** *captained the semi-finalist team for Trinity College, Cambridge*

Talks

(I) = invited, (C) = contributed

2027 (I) **Physics Theory Group Seminar, Uni. of Warwick, UK**
title tbc (05/02/27)

2026 (I) **Fluid Dynamics Seminar, Uni. of Warwick, UK**
Soft solids meet hard flow: pressure-driven fluid flow through deformable porous materials (04/11/26)

2026 (I) **Mathematical Modelling for Peat's Sake, Uni. of Warwick, UK**
Peat as a hierarchical poroelastic medium (09/06/26)

(C) **British Applied Mathematics Colloquium, Norwich, UK**
Forming channels in poroelastic beds through pressure-driven flow (01/04/26)

(I) **DAMTP ITG Lunchtime seminar, Uni. of Cambridge, UK**
Channel-forming instabilities in poroelastic media under pressure-driven flow (25/02/26)

Soft Matter Lunch, Uni. of Warwick, UK
When too much water dries out a gel: channel-forming instabilities in pressure-driven flow (18/02/26)

(I) **Applied Mathematics Seminar, Uni. of Nottingham, UK**
A linear-elastic-nonlinear-swelling model for hydrogels (15/01/26)

2025 (I) **Online CMIM group seminar, Department of Mathematics & Statistics, University of Strathclyde, UK**
A tractable framework for modelling hydrophilic large-swelling gels (01/10/25)

(I) **2nd European Fluid Dynamics Conference, Dublin, Ireland**
Poromechanical modelling of pumping with responsive hydrogels (28/08/25)

Uni. of Warwick, UK
SUMR Meeting 7: How to prepare and present maths posters (20/08/25)

(I) **British Applied Mathematics Colloquium, Exeter, UK**
Getting stressed about frozen gels (25/06/25)

(I) **Fluid Mechanics Seminars (online), Royal Society Publishing** 10.52843/cassyni.4wj1kq
Freezing of hydrogels: modelling cryosuction, deformation and ice growth (18/06/25)

(I) **Department of Materials, ETH Zurich, Switzerland**
Modelling hydrogels at both ends of the temperature spectrum (27/05/25)

2024 **Modelling hydrogels: building networks in the Mathematical Sciences, Uni. of Warwick, UK**
Deswelling response to temperature changes (09/12/24)

Ⓒ **77th Annual Meeting of the Division of Fluid Dynamics (APS), Salt Lake City, USA**
XOXO, Gossip Gel: oscillating chemical reactions facilitate communication between responsive hydrogels (25/11/24)

Uni. of Warwick, UK
How to make a poster: ...also how you shouldn't, why you should care, and why they matter (28/08/24)

Ⓘ **Mathematical Biology Meeting, University College London, UK**
Smart responsive gels: designing the building blocks of squishy bio-inspired devices (30/10/24)

Soft Matter Lunch, Uni. of Warwick, UK
Tubular hydrogel pumps through a responsive LENS (30/09/24)

Ⓘ **Soft Lab Seminar, Bristol Robotics Laboratory, Uni. of Bristol, UK**
A linear-elastic-nonlinear-swelling model for hydrogels (03/07/24)

Ⓒ **UKFN BioActive & Non-Newtonian Fluids SIG Meeting, University College London, UK**
Buckling and swelling instabilities of super-absorbent gels (18/06/24)

Ⓘ **Physics of Fluids and Soft Matter seminar, Uni. of Manchester, UK**
A linear-elastic-nonlinear-swelling model for hydrogels (17/05/24)

Ⓒ **Warwick–Cambridge Quantitative Cell Biology Symposium, Uni. of Warwick, UK**
Freezing soft porous gels (16/05/24)

Ⓘ **Warwick Applied Maths seminar, Uni. of Warwick, UK**
A linear-elastic-nonlinear-swelling theory for hydrogels (03/05/24)

2023 Ⓘ **Squishy Journal Club, Uni. of Oxford, UK**
Buckling and swelling instabilities of super-absorbent hydrogels (28/11/23)

Ⓒ **76th Annual Meeting of the Division of Fluid Dynamics (APS), Washington DC, USA**
Wrinkling instabilities of swelling hydrogels (21/11/23)

Ⓒ **15th Annual InterPore Meeting, Edinburgh, UK**
Linear stability analysis for the formation of wrinkles on confined swelling hydrogels (24/05/23)

2022 Ⓒ **75th Annual Meeting of the Division of Fluid Dynamics (APS), Indianapolis, USA**
A linear-elastic-nonlinear-swelling theory for hydrogels: displacements and differential swelling (20/11/22)

Ⓒ **14th Annual InterPore Meeting, online**
Multidirectional gel swelling and drying: a linear-elastic-nonlinear swelling theory for hydrogels (02/05/22)

DAMTP Friday Fluids second year talks, Uni. of Cambridge, UK
Dynamics of super-absorbent hydrogels (27/05/22)

2020 Ⓘ **Pure & Applied Maths colloquium, Open University, UK**
Stokes drift through coral reefs (04/02/20)

2019 Ⓒ **Stokes200 Symposium, Uni. of Cambridge, UK**
Stokes drift through corals (17/09/19)
